

Copyright Tools

Public Domain Slider

<https://librarycopyright.net/resources/digitalslider/index.html>

The [Public Domain Slider](#) is a tool to help determine the copyright status of a work that is first published in the U.S. Most of us know that any work published before 1923 is in the public domain, but the copyright status for copyrighted works after 1923 can be difficult to determine. There are many works in the public domain that have been published *after* 1923 because registration was not renewed and/or the copyright symbol – © – does not appear on the work. If a work is in the public domain, you are free to use that work in any way that you choose – digitize it, re-publish it, post it on the web etc. with appropriate attribution. For those works that are still protected by copyright, don't forget to consider [fair use](#) to determine if the work can be used in other more limited ways.

Section 108 Spinner

<https://librarycopyright.net/resources/spinner/index.html#>

This [simple tool](#) can help you determine whether or not a particular reproduction is covered by this exemption. Section 108 of the U.S. Copyright Code allows libraries & archives, under certain circumstances, to make

reproductions of copyrighted materials without the permission of the copyright holder.

Exceptions for Instructors eTool

<https://librarycopyright.net/resources/exemptions/index.php?startOver=true>

The [Exceptions for Instructors eTool](https://librarycopyright.net/resources/exemptions/index.php?startOver=true) guides users through the educational exceptions in U.S. copyright law, helping to explain and clarify rights and responsibilities for the performance and display of copyrighted content in traditional, distance and blended educational models.
